Portfolio: <https://ronpitts90.github.io/new-port/>

Summary

Full stack web developer that has created, individually and with teams, projects and assignments that consist of HTML, CSS, JavaScript and using the MERN (Mongo, Express, React, Node) stack.

Technical Skills

Languages: HTML, CSS, JavaScript, and MySQL

Frameworks: React.js, Express.js, jQuery, and Bootstrap, Node

Core Concepts: Tags, Data types & structures, Variables, Functions, MVC & databases, and Github

Other Skills: Adobe Photoshop, Adobe Illustrator

Projects

Travel Guide Project

<https://github.com/AlecWGreene/MSU-Project-1> | <https://alecwgreene.github.io/MSU-Project-1/index.html>

Allows the user to type in a city and then the API call would fetch tourists' attractions in the area.

- Responsibilities: Create the front-end portion of the app using basic HTML & CSS
- Languages: HTML, CSS, JavaScript

Budget App

<https://shrouded-reaches-29613.herokuapp.com/> | https://github.com/WD40JS/project_2

Manages and helps users budget their money out by allowing them to input any money coming in and out, returning an exact dollar amount of what is left.

- Responsibilities: Coding the calculator using Javascript that took in all bills/income with the name of said bill and calculated what was leftover. The data displayed on a pie chart separated into three categories.
- Languages: HTML, CSS, JavaScript, MySQL.

Ashen-Void (tower defense game)

<https://ashen-void.herokuapp.com/game> | <https://github.com/AlecWGreene/MSU-Project3-Four-Horsemen>

A tower defense game where the user logs in and creates a user name. The user's goal is to build a wall and towers to defend against space invaders that drop in by waves.

- Responsibilities: Implementing the drag and drop npm for the objects such as walls and towers. Helping to build styled components to make the UI use more fluid.
- Languages: HTML, CSS, JavaScript, React-Draggable, React-Bootstrap, React, use-sound.js and many others.

Education

Certificate in Full Stack Web Development, Michigan State University

Graduated November 2020

Attended MSU's coding bootcamp and learned to become an asset in the software industry. Curriculum focused on multiple languages from basic HTML, CSS, and JavaScript to jQuery, React.js, and SQL.
